

ZEN CONTAINERISED INDOOR SHOOTING RANGE (ZEN CISR)

Zen CISR is a self-contained, transportable, live-fire shooting facility. It is designed and built to include the target retrieval system/firearm judgmental training video simulator or to serve as a forensic ballistic test facility. Latest acoustic and ricochet materials have been used inside the Shooting Range to create a clean, safe and discreet environment to carry out the live-fire requirements.

Fire retardant materials, a seamless ballistic-safety floor system, emergency lighting and HSE signs ensure the Shoot Box is ballistically secure.

The Mains or generator-powered CISR:

- Allows shooters to train with Small Arms of up to .50 calibre
- Contains sophisticated ventilation and air-conditioning system
- Has provisions for a variety of 'soft' bullet catchers, depending on the application of the facility
- Supports Target Retrieval System and Video Targetry Simulator
- Allows 360° CCTV monitoring from the Control room
- Lends itself to customisation with additional units. Length, width, storeys/levels can be increased by placing additional units either laterally or vertically
