

ZEN CONTAINERISED TUBULAR SHOOTING RANGE (ZEN CTSR)

Zen Containerised Tubular Shooting Range is a secure indoor substitute for live-firing. It is self-contained, transportable and reduces considerably the area required for a range. It can also be used to test weapons or as a forensic ballistic test facility.

Two trainees can fire at a time. There is no injury-risk for the shooters, even from accidental fire as each shooter is confined to a tubular booth. The design of the tubular booth is such it does not allow the fired bullets escape from it.

Fire-retardant materials have been used to ensure the range is safe for training and testing and it is fitted with emergency lighting and HSE signs.

The Range that is available in a standard 40' container:

- Facilitates training with Small Arms
- Lets firers practise even in lying position
- Accommodates extension of the length of range with additional containers
- Includes a target system that detects bullets' points of hits and displays them on Firing Point Equipment which is placed close to the firer
- Contains projection systems that beam selected target, terrain and range on to the detection system
- Offers a display system that enables Commander/instructor to view the activities of firers inside the container as well as bullet hits on targets
- Provides record-replay facilities for After Action Review
