## Press & Media Release

Hyderabad, September 24, 2021

### **MoD promulgates framework for increased utilisation of simulators by the three Services & Indian Coast Guard.**

Ministry of Defence (MoD) has promulgated the framework for increased utilisation of simulators by the Indian Army, Indian Airforce, Indian Navy, and the Indian Coast Guard to transform to simulation-based training across all military domains to achieve cost-effective, safe and smart training. The framework emphasises indigenous design and development as well as outsourcing simulator operation and maintenance to Indian Companies. The policy will apply to all types of simulators currently in use or to be purchased by the Armed Forces in the future.

**Mr Ashok Atluri, Chairman, Managing Director, and CFO, commented on the government initiative, saying,** *“This is unquestionably the right strategic decision taken by the Indian Government. The transformation from training on actual equipment to simulation-based training across all military domains will lower training costs by saving on ammunition and logistics, extend the life of operational equipment, improve the operational readiness of the armed forces, and give a huge boost to the morale of the troops.”*

He further added *“The framework will provide a significant boost to Indian companies involved in the design, development, and maintenance of defence training simulators. Furthermore, the idea of outsourcing the operation and maintenance of simulators to Indian companies is a huge plus. While outsourcing military training to companies is common in countries like the USA, this is a bold move by the Government of India and the Armed Forces. With guaranteed uptime of training equipment, the military can train more reliably. Overall, simulation training and outsourcing could save thousands of crores - a very smart and prudent move by the Indian Government.”*

#### **About Zen Technologies Limited**

Zen Technologies Limited is a pioneer and leader in providing world class state-of-the-art Defence Training Solutions, Drones and Anti- Drones solutions and has a proven and impeccable track record in building training systems for imparting defense training and measuring combat readiness of security forces. The company is engaged in indigenous design, development and manufacture of sensors and simulators technology based defence training systems and has relentlessly been providing Defence Training Solutions and seamless services to Ministry of Defence (Armed Forces), Security Forces Police, Para-military forces and is privileged to have served the nation for over 2.5 decades.

The company manufactures land based military training simulators, driving simulators, Live range equipment and Anti drone Systems. With a dedicated R&D (recognized by the Ministry of Science and Technology, Government of India) and production facility in Hyderabad, the company has applied for over 90 patents and shipped more than 1000 training systems around the world.
