### Zen Technologies to Demonstrate Integrated Training Systems for 24/7 Combat Readiness at IDEX 2019

*New technologies and data analytics extend capabilities and training systems to train and quantitatively measure Combat Readiness of defence & security forces*

**Abu Dhabi, United Arab Emirates – ## Feb 2019** - Zen Technologies will exhibit at two locations at Stall B10 in Hall 1 and Stall C2-001 in Hall 2 at the Abu Dhabi National Exhibition Centre (ADNEC), Abu Dhabi, United Arab Emirates.

Zen Technologies will demonstrate a new generation of training systems to train and quantitatively measure Combat Readiness of defence & security forces. For a soldier or unit to be at true combat readiness, training must be in realistic environments with after-action analysis of skills based on objective and subjective guidelines. At IDEX, Zen Technologies will demonstrate capabilities, new technologies and training systems that develop, maintain, improve and quantitatively measure Combat Readiness of Land Forces.

Zen will showcase Zen's **Combat Training Centre (CTC)** a fully integrated and distributed training platform that integrates Live Fire, Live Force-on-Force, Virtual and Constructive (L-LVC) training, all operating under a Common Operating Picture.

Zen will demonstrate its family of point-of-need training solutions, including **CTSR**, Zen's popular containerized live-fire shooting range, bringing training to remote or urban areas where soldiers or security officers fine-tune their combat skills with small arms marksmanship or judgmental training exercises. Zen will also demonstrate its transportable and rapid deployment-capable **T90 Containerized Tank Driving Simulator** for basic and advanced tank drills and driving techniques.

Zen will show **AWeSim®**, a small arms trainer for developing, maintaining and improving marksmanship, judgmental and reflex skills. AWeSim will introduce a new semi-automated scenario authoring tool to enable remote Units to rapidly create their own training scenarios at point of need without requiring specialized skills.

Zen Technologies will display **TacSim®**, a laser instrumented tactical engagement simulation system to judge, develop and maintain brigade-level collective skills through large-area force-on-force training exercises.

Zen Technologies at IDEX (Stalls B10 in Hall 1 and C2-001 in Hall 2), at Abu Dhabi National Exhibition Centre (ADNEC), Abu Dhabi, United Arab Emirates is the place to see the most up-to-date training systems to develop 24/7 Combat Ready soldiers.

**Works** : Plot 36, Hardware Park, Near Shamshabad International Airport, Hyderabad - 501 510, Telangana, India

**CMMI DEV/5**<sup>SM</sup>  
Exp. 2018-11-26 / Appraisal #25686

### **About Zen Technologies**

Zen Technologies was founded on the understanding that combat training is fundamental for combat readiness of defence and security forces. No matter where or when armed forces are deployed, the skills of a fighting force must constantly be refined and aligned with mission needs and situations. Zen Technologies is a global leader in the development of live, virtual, and constructive combat training systems, with an extensive portfolio of over 60 combat training systems to address a vast array of training needs from individual skills development to brigade-level training to develop combat ready forces. For additional information contact Zen Technologies globally at +91 40238 13281 or in US +1 202 548 7423 or via email at [info@zentechnologies.com](mailto:info@zentechnologies.com).
