Dear Sir/Madam,

Sub: Press Release

Please find attached the press release titled *“On Kargil Vijay Diwas Anniversary | Zen Technologies Unveils India's First High-Altitude Man-Portable Anti-Drone System for Modern Mountain Warfare”*.

This is for your kind information and records.

Thanking You

Yours sincerely,

For Zen Technologies Limited

Sourav Dhar
Company Secretary & Compliance Officer

On Kargil Vijay Diwas Anniversary | Zen Technologies Unveils India's First High-Altitude Man-Portable Anti-Drone System for Modern Mountain Warfare

Hyderabad, 26 July 2026 | On the occasion of Kargil Vijay Diwas, Zen Technologies Limited, India's leading defence technology company, today unveiled its **High-Altitude Man-Portable Anti-Drone System (MPADS)**, an indigenous, lightweight counter-UAS solution engineered to protect troops operating in mountainous and remote terrain.

The launch commemorates the courage and sacrifice of the Indian Armed Forces during the Kargil conflict while addressing one of the most pressing challenges in modern warfare: the growing use of drones across high-altitude battlefields.

Designed for rapid deployment in difficult terrain where conventional vehicle-mounted systems are impractical, the Man-Portable Anti-Drone System combines advanced RF detection, intelligent data fusion, and omni-directional jamming into a compact, mission-ready solution. The system can be carried by soldiers, pack animals, all-terrain vehicles (ATVs), or unmanned ground vehicles (UGVs), ensuring mobility across diverse operational environments.

Zen Technologies High-Altitude Man-Portable Anti-Drone System, Features:

- Drone detection ranges of up to 5 km through continuous wideband RF scanning across the 400 MHz to 6 GHz spectrum.
- Omni-directional jamming up to 3 km, capable of disrupting drone command links and GNSS signals simultaneously.
- Multi-target and swarm detection capabilities, enabling forces to counter coordinated drone attacks.
- 24x7, all-weather operation with indigenous, state-of-the-art architecture.

At the heart of the solution is Zen's RF-Based Drone Detector (RFDD), which employs advanced Correlative Interferometry and Digital Beamforming techniques to accurately determine the bearing of hostile drones. This is integrated with a Data Fusion & Command Centre (DFCC) that consolidates sensor inputs into a single tactical picture, allowing operators to monitor threat zones, classify aerial threats, analyse spectrum activity, and make rapid engagement decisions.

With increasing drone activity in high-altitude regions and contested border areas, portable counter-drone capabilities are becoming an essential component of frontline force protection. Zen Technologies' latest solution strengthens India's indigenous defence ecosystem by delivering a scalable, rapidly deployable capability that enables troops to detect, track and neutralize aerial threats wherever the mission demands.

ON KARGIL VIJAY DIWAS

ZEN TECHNOLOGIES

UNVEILS INDIA'S FIRST

High-Altitude Man-Portable Anti-Drone System

for Modern Mountain Warfare

FEATURES

- Detects drones up to 5 km
- 3 km Omni-directional drone signal jamming
- Detects multiple drones & swarms simultaneously
- 24x7 all-weather indigenous combat-ready operation

MISSION READY MOBILITY

- Humans
- Pack Animals
- ATV
- Bike
- UGV

About Zen Technologies Limited

Zen Technologies Limited is a pioneer and leader in providing world class state-of-the art Defense Training and Anti-Drone solutions and has a proven track record in building training systems for imparting defense training and measuring combat readiness of security forces. With a dedicated R&D (recognized by the Ministry of Science and Technology, Government of India) and production facility in Hyderabad, the company has applied for over 200+ patents and shipped more than 10,000 systems around the world. With over 30+ years' experience fielding realistic combat training solutions to armed forces worldwide, Zen constantly updates its portfolio to include new solutions for emergent threats. Leveraging its world-class, in-house production facilities, Zen has developed strategic solutions tailored to the specific needs of End Users Ministry of Interiors and Ministry of Defense including customized training.
